Summary

Software Engineering student at 42 Luanda with hands-on experience in full-stack development, scalable system design, and infrastructure. Founder and Lead Developer of Cur10usX — an EdTech SaaS platform built to digitalize school management and empower students through performance tracking and gamification. Self-driven, fast learner, and comfortable working autonomously in remote environments.

Experience

Software Engineering Student

42 Luanda

2024 – Present

- Completing the Common Core curriculum covering C, algorithms, OS, networking, and web development
- Applied peer-to-peer methodology — learning through real project delivery with no traditional instructors
- Built projects spanning low-level programming, infrastructure, and full-stack web development

Founder & Lead Developer

Cur10usX (EdTech SaaS Startup)

2025 – Present

- Leading the development of an EdTech SaaS platform focused on school management and student performance
- Designing scalable full-stack architecture and multi-role systems
- Managing product development and core technical implementation
